Annual herb, herbage glabrous throughout. Stems simple or sparingly branched near base, 5-10 cm high. Leaves 1-5 cm long, pinnately divided; leaflets linear to oblanceolate, 3-8 mm long. Peduncles stout, glabrous, 2-4 cm long. Flowers: sepals broadly lanceolate, acute, 6-10 mm long, glabrous to sparse woolly hairy within, glabrous without; petals white, oblong, rounded, less than or equaling the sepals. Fruit: nutlets, ovoid, wrinkled below.

Lookalikes

Limnanthes pumila ssp. *grandiflora*
Limnanthes floccosa ssp. *floccosa*

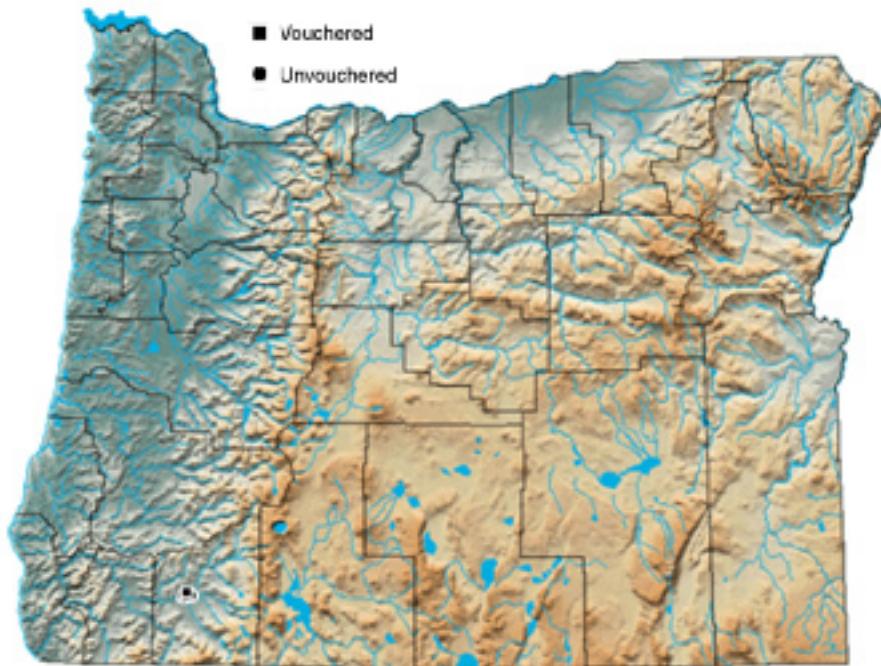

differs from featured plant by
Ssp. *pumila* has glabrous stems and
leaves

Limnanthes pumila Howell ssp. *pumila*

Dwarf meadowfoam

PLANTS symbol: LIFLP2

August 2019 status Federal:SOC; Oregon:LT; ORBIC: List 1

Distribution: Summits of Upper and Lower Table Rocks, and adjacent valley floor in central Jackson Co., Oregon.

Habitat: The edges of vernal pools and very moist soil.

Elevation: 350 - 700 m

Best survey time (in flower): March – April

Associated species:

Lasthenia californica ssp. *californica* (California goldfields)

Collinsia grandiflora (Giant blue eyed Mary)

Lupinus bicolor (Miniature lupine)
